

Quote App:

- On the master rates tab – the table should have a column at the start for numbering the rows. This will allow us to arrange the drop down in tab 1 in order that we want.
- Mandays calculation on tab 2 is incorrect it should be as follow:
(Labour Total /2) /350
- Job card should have blank space to fill in deviations/ spec of colours.
- Job card does not say what must happen.
